What are Input and Output Devices?
Input Devices: Hardware used to enter data or commands into a computer.
Output Devices: Hardware that displays or presents the processed data from a computer.

Input Devices

Device	Function
Keyboard	Enters text, numbers, and commands
Mouse	Controls the cursor and selects items
Scanner	Converts paper documents into digital format
Microphone	Inputs voice or audio
Webcam	Captures images and videos
Barcode Scanner	Reads barcode information
Touchscreen	Accepts touch as input
Joystick	Used for gaming and simulations
Graphics Tablet	Used for digital drawing and design
Fingerprint Scanner	Biometric authentication

Output Devices

Device	Function
Monitor	Displays text, images, and videos
Printer	Produces hard copies of documents
Speakers	Outputs sound
Headphones	Personal audio output
Projector	Displays the computer screen on a large surface
Plotter	Prints large engineering or architectural drawings

Devices That Are Both Input and Output

Device	Input	Output
Touchscreen	✔	✔
Multifunction Printer	✔ (Scanner)	✔ (Printer)
Network Interface Card (NIC)	Sends data	Receives data
Modem	Sends data	Receives data
Headset	Microphone	Speakers

Desktop Support Troubleshooting

Keyboard

Check USB/Bluetooth connection.
Test on another USB port.
Reinstall or update the keyboard driver.
Replace batteries (wireless keyboard).

Mouse

Verify connection.

Clean the optical sensor.
Update or reinstall the driver.
Test with another computer.

Monitor

Check power cable and video cable (HDMI, DisplayPort, VGA).
Verify input source.
Adjust brightness and resolution.
Update the graphics driver.

Printer

Check power and USB/network connection.
Ensure paper and ink/toner are available.
Clear paper jams.
Restart the Print Spooler service if print jobs are stuck.

Scanner

Check cable connection.
Install the correct driver.
Verify scanner software settings.
Speakers
Check volume and mute settings.
Verify the default playback device.
Update the audio driver.

Common Interview Questions

What is an input device?
What is an output device?
Give five examples of input devices.
Give five examples of output devices.
Which device can be both an input and an output device?
How would you troubleshoot a keyboard that is not working?
What should you check if a monitor displays "No Signal"?
How do you troubleshoot a printer that is not printing?
